

Understanding ISO 14001:2004

ISO 14000 is a group of voluntary international standards addressing environmental management systems and environmental auditing

The purpose of this standard is to help all types of organizations to protect the environment, to prevent pollution, and to improve their environmental performance.

ISO 14001:2004 specifies requirements for an environmental management system to enable an organization to develop and implement a policy, objectives which take into account legal requirements and other requirements to which the organization subscribes.

Participants will engage in activities that create an understanding of each standard element and will get the knowledge upon which they can effectively build an environmental management system using ISO 14001 as a model.
