

Information Security Management Systems Auditor/Lead Auditor Course # A17502

Duration: 5 Days

Application has been made to IRCA for the certification of this course.

Course description

This five-day intensive course enables participants to develop the expertise needed to audit an information Security Management System (ISO 27001:2005) and to manage a team of auditors by applying widely reorganized audit principles, procedures and techniques. During the training, the participant will acquire the knowledge needed to plan and perform audits compliant with the certification process of standard 27001:2005. Through an exciting accelerated learning approach, you will be able to follow the stages in the live audit; including simulated audit interviews and role plays. The participant will be able to develop the abilities (mastering audit techniques) and skills (managing audit teams and audit program, communicating with customers, conflict resolution, etc.) necessary to conduct of an audit. This course meets the training requirements for delegates seeking registrations as an auditor.

What you will learn?

- 1-Understanding the application of the information security management system in the ISO 27001:2005 context
- 2-Understanding the relationship between the information security management system, including the management of risks and controls and the various stakeholders.
- 3-Understanding audit principles, procedures, techniques, and being able to apply them in the audit framework.
- 4-Understanding the legal, statutory, regulatory or contract obligations relevant during an ISMS audit.
- 5-Acquiring the personal skills required to perform an audit in an effective and cost-effective manner, and managing an audit team.
- 6-Preparing and completing an audit report ISO 27001.
