

الأكاديمية العربية للعلوم والتكنولوجيا والنقل البحري

Arab Academy for Science, Technology & Maritime Transport

Welcome from the dean,

It's my pleasure to welcome you to the college of management and technology. In my role as Dean of College of Management and Technology, I am extremely proud of the excellent quality of the management school's programs. Since our establishment in 1991 we have been committed to international education, ethical and sustainable business practices, technology, and innovation attracts top-notch students as well as business leaders seeking a competitive edge through our education programs.

The College of Management strongly emphasizes first-class research and teaching. Substantial international cooperation has been established with partner universities including Cardiff Metropolitan University, London School of Economics and Dakota State University. This was reflected in the fact that a significant number of successful entrepreneurs have graduated from the CMT. It is anticipated that those graduates will help business organizations in Egypt to significant and competitive positions in global business environment. Therefore, the CMT looks forward to educate new generation of business leaders to meet economic challenges all over the world, and who are capable to integrate the Egyptian economy into the economies of the world.

The intersection of management and technology has always been at the heart of the College. Our nationally ranked business school teaches students how to take advantage of the many business opportunities made possible by emerging technologies and to succeed in an increasingly global economy.

Finally, at the CMT we believe that with the right people and programs in the right place, we're creating a new standard in business education. Therefore, I welcome your interest in studying with us and contributing to this crucial aspect of modern society since education is fundamental to improving the well-being of individuals and communities.

The CMT also provides communication channels with its local and global community and social dialogue. It also accesses the latest technology development and adopts sustainable use of resources. Finally, the CMT considers all the procedures required to prevent the pollution.

Sincerely,

Prof. Dr. Aiman Ragab

Professor of Accounting and Finance
Dean of the College of Management and Technology
Arab Academy For Science and Technology and Maritime Transport.
