Knowledge to perform

# IMIST

The OPITO standard supporting the global oil and gas industry to meet safety initiative targets.

- IMIST has been developed to provide a new global standard for HSE training, which will provide a comprehensive and consistent level of training across the world and enhance workforce safety and compliance.
- The IMIST standard ensures that workers have the necessary safety awareness and training to reduce risk and ultimately reduce the number of incidents.
- Significant cost savings and ease of recruitment can be achieved, as IMIST will reduce the need to continually repeat and duplicate training.

# What topics are covered in IMIST?

IMIST has been designed to enable existing workers to demonstrate their knowledge and awareness of the necessary safety standards to avoid risk and incidents. The course contains nine modules:

1. Introduction to the Hazardous Environment
2. Working Safely
3. Understanding the Risk Assessment Process
4. Tasks that Require a Permit to Work
5. Personal Responsibility in Maintaining Asset Integrity
6. Using Manual Handling Techniques Every Day
7. Controlling the Use of Hazardous Substances
8. Knowledge and Processes of Working at Height
9. Being Aware of Mechanical Lifting Activities

# OPITO

## Improving safety and competence in the global oil and gas industry

OPITO is a unique, not for profit organisation, wholly owned by the oil and gas industry.

Committed to:

- Developing and sustaining a safe, skilled and competent workforce now and in the future
- Improving industry safety standards by identifying and meeting the core demands of the global oil and gas industry
- Providing, maintaining and developing internationally recognised industry standards in safety training and competence assurance

This is achieved by working in collaboration with a well established network of industry employers, learning and training providers, education and academia and partnership organisations.

What are OPITO Standards?

The OPITO standards are a set of training and /or competence standards; produced and agreed by the oil and gas industry covering a variety of offshore emergency response duties and occupational roles.

# ATLAS

## International learning and skills provider

Atlas is the approved training provider working in partnership with OPITO to develop and deliver this new standardised safety training to the global oil and gas industry.

Atlas works with clients to transform their business and provide a competitive advantage through cost effective and innovative learning, compliance and competency solutions, improving your business efficiency and employee effectiveness, whilst protecting your people, assets and corporate reputation.
