

The College of Engineering and Technology

Engineering education is a **major driving force** that affects the progress of humanity at large. It does not only influence academic and technological progress, but also the economic and social development of any given country. AASTMT has found it essential, as one of its **first priorities**, to standardize the teaching programs and courses it offers to the different sectors of its student body.

Summer courses

From 7th of June to 16th of August

You can choose between a **large numbers** of courses covering **all** departments in English or in French (for management courses).

"Come and get an international experience in Alexandria and enjoy sun, beach and Mediterranean atmosphere in the cosmopolitan Alexandria and if you wish, learn the Colloquial Arabic and use it in the souk, in the restaurants, with taxi drivers, just live the Egyptian life..."

Price for external students: 2000 € or 2600\$

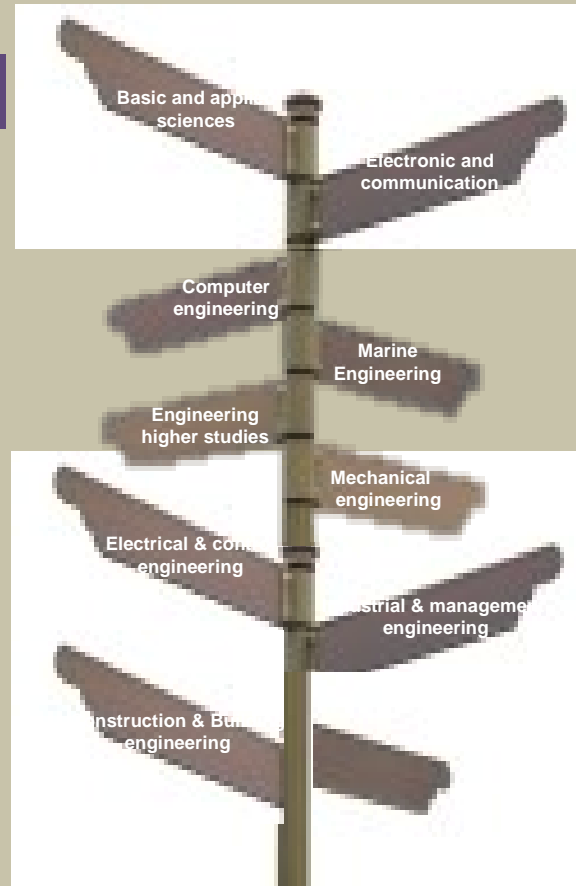

Price for exchange students: 600€ or 800\$

Cairo

Testimony of a foreign student

Léa Couturier (21y)

"I am a student at the University of Le Havre France and I have been studying engineering in Alexandria on the Abu Kir campus during four months."

*When I arrived the first time at the Academy, I was really surprised: Abu Kir campus is a **huge campus** really different than the French one because you can find all you want and need on it: bank, clinic, dorms, gymnasium and restaurant. I particularly appreciated to spend time after lectures with my friends in Starbucks."*

*Being in Egypt means **speaking in English** to people but **also in Arabic**. I started to learn Arabic at the Academy and it helped me a lot to buy and to haggle over products in souks and also to speak to taxi drivers. Moreover, the welcoming group of students welcomed me, helped me each time I needed it and also, we visited some places in Alexandria."*

*The most important point of this international experience is, for me, discovering the **Egyptian culture**. They have an important history and Alexandria is rich of historical place. My favorite one is definitively Montaza and its gardens! I also tried the Egyptian food and I enjoyed the seafood platter served from fish man!"*

If I would have the choice, I will do it again!

The College of Management and Technology

Since the establishment of the college of Management and Technology (CMT) in 1991, it has been committed to **international education**, ethical and sustainable business practices, technology, and innovation. It attracts **top-notch students** as well as **business leaders** seeking a competitive edge through our education programs.

See our poster and our program presentation for more details!!

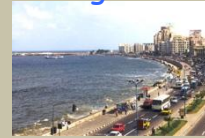

Museum of Cairo

Summer Courses

From 7th of June to 16 of August

Trip all over around Egypt

Welcoming group students and International team will have the pleasure to welcome you. Study and enjoy in the same time!

Alexandria

In Alexandria, there are many things to do. The city is rich of famous and **historical place** like Alexandrian Bibliotheca, Montaza Palace and its gardens, the Citadel, souks and the Opera. Try the Alexandrian **gastronomy**: seafood directly prepared from the fish man in their place. You will also go to the North Coast to visit luxurious villages and enjoy the **beach**!

Sharm El Sheikh

This is the Ibiza of Egypt. Here, you will enjoy sun, sea, water sport and discover **different landscape** such as beach, mountain and safari.

Cairo

Come and visit the **pyramids, old Cairo** and famous Egyptian museums, and discover our Tahrir Square.

Citadel of Alexandria

Testimony of a foreign student

Claire Le Calvez (22y)

"I am a student at the ESC Rennes School of business in France and I have been studying in Alexandria on the Miami campus during one semester (4months).

*Concerning the Academy itself, first of all people were really **welcoming**, the teachers as long as administrative staff and the students. Then, when I arrived, I had a **huge choice** for the subjects so I could adapt my schedule depending on my professional project. Moreover, I particularly appreciated to have a conference with CEO of Google in Arabic countries because it was really interesting to understand how they live management in Middle East.*

*The **campus is really different** than the French one thanks to its restaurants, its gardens and all the places to sit and enjoy the sun after classes!*

*Although living in Egypt is strongly different than living in France, I really spent **good time** here with my Egyptians friends. Beside the studies, I had time to visit Alexandria and others places in Egypt such as Cairo, Aswan, Sharm-El-Sheikh and Louxor. During my stay, I learnt a lot about the **Oriental culture**. It was not always easy but I will never regret to have been a student at Arab Academy!"*
