

Assignment # 1: Climate and Traditional Architecture around the World

For each of the four climate types, Cold, Temperate, Hot/Dry, and Warm/Humid (see Text Book, Table 1.2, p. 7), find 3 to 4 pictures of examples of residential traditional vernacular architecture from different parts of the world that illustrate the strong impact of climate on built form and the presence of common physical/architectural features among buildings from different places with similar climate conditions.

Required Format:

For each of the four climate types:

Type of Climate:	
Typical Climate Characteristics:	
.....	
Common Physical Features in Traditional Vernacular Architecture from Different Parts of the World:	
1.	3.
2.	4. Etc...
