

## Automatic Tank Gauging Z IPC-10

### Duration

Three days 18 Hours

### Who should attend?

- Instrument engineers and technicians.
- Operation and process engineers and technicians.
- Project managers and technicians.

### Language

Arabic , English

### Overview

This course is designed to help instrumentation staff to be familiar with :-

- Tank gauging techniques
- Tank gauging installation
- Progress in tank gauging technology

### Topics

- Introduction to tank gauging.
- Tank gauging techniques.
- Servo motor type.
- Radar type.
- Ultrasonic type.
- Quantity assessment in tank gauging
- Uncertainties in tank gauging
- Safety
- Developments in tank gauging technology
- Future trends in tank gauging technology
- Tank gauging project management
- Case study
