

Compressors

Duration

1 day 5Hours

No. of Attendees

Max. 25 Attendees

Language

Arabic, English

Overview

The purpose of this course is to enhance participant's knowledge and skills in compression methods and types of compressors (continuous compression compressors, reciprocating compressors and centrifugal compressors). The course will discuss the characteristics, performance, maintenance and troubleshooting of compressors.

Topics

- Introduction
- Compression methods
- Continuous Compression Compressors
- Reciprocating compressors
 - Description
 - Performance
 - Mechanical Design
- Centrifugal Compressors
 - Introduction
 - Performance
 - Mechanical Design
- Maintenance
