

## **Motors**

### **Duration**

1day 5Hours

### **No. of Attendees**

Max. 25 Attendees

### **Language**

Arabic, English

### **Overview**

This course provides trainees with the basics of electrical motors operating principles. By the end of this program, participants will be empowered by the knowledge and skills to identify different types of motors including DC motors, three phase AC motors and single phase AC motors. Major components and operating principles of each type will be fully explored during the course.

### **Topics**

- Basic Electric Motor Operating Principles
- DC Motors: Types, Major Components, and Operating Principles
- Three-Phase AC Motors: Types, Major Components and operating principles
- Single-Phase AC Motors: Types, Major Components, and operating principles
