

Separators Operation, Design, Maintenance & Inspection Z MEC-35

Duration

Three days 18 Hours

Who should attend?

Maintenance, Process and Technical Support
Engineers & Supervisors

Language

Arabic , English

Overview

This course covers those subject essential to understanding the design , operation , maintenance testing & inspection for different types of separators The aim of this course is to enhance the knowledge and skills of participating engineers in the following topics

Contents

- Types of Separators
- Separation Process
- Design Considerations
- Process & Material Selection
- Fabrication & Installation
- Control & Instrumentation
- Operation & Maintenance
- Testing & Inspection
- Repair & Derating
- Code & Standard
- Case Study
