

Hydrocarbon Processing

Duration

2days 10 Hours

No. of Attendees

Max. 25 Attendees

Language

Arabic , English

Overview

This course aims to provide the trainees with the principles of hydrocarbon processing. By the end of this program, participants will identify the structure, nomenclature and classification of hydrocarbons. They will understand the composition of natural gas and oil, and how to apply the acquainted knowledge in natural gas plant processing.

Topics

- Introduction to Organic Chemistry
- Structure, Nomenclature and Classification of Hydrocarbons
- Composition of Natural Gas and Oil
- Plant Processing of Natural Gas
